

What is a website?

 [Print](#)

A website, or 'site', is simply a collection of web pages that relate to each other and sit within the same internet domain – for instance, digitalunite.com. The main, or initial, page is known as the '[home page](#)' and here you'll find [hyperlinks](#) (or 'links') to all the other 'subpages' contained within the website. These links are usually highlighted or made distinctive in some way, allowing you to find them easily so that you can click on them to get to another part of the site.
