

Course List

Our Networks are based on a huge range of certified online courses.

They are the principal reason our members use the Network. The courses improve a Champion's own digital skills and confidence and teach them how to help all sorts of learners, in all sorts of ways. When you sign-up to the Network, you can pick and choose the training that's right for your project and your Champions.

You can also [try a course for free](#) to see what it's like.

Flexible
e-learning

The interactive e-learning can take from **5 minutes to 50 minutes** and includes practical and reflective exercises, videos and case studies. Courses can be stopped and started at any time and each one comes with a **certificate of achievement and a Digital Badge**.

Professional certification

Our courses are certified by **The CPD Certification Service**, meeting the universally accepted principles of Continual Professional Development. So you know your Digital Champions are getting good quality training.

Designed
by experts

We've partnered with leading organisations to gain their expertise on helping specific groups of learners. Think older people from **Age UK**, accessibility barriers from **AbilityNet**, and online health from **NHS Digital**.

Our full range of courses
