

## Client membership packages

Thanks to significant Lottery-funding as part of [One Digital](#) we're currently able to offer **significant discounted membership** of the Network making now the **perfect time to become a Member**.

Independent research shows that just one Network-trained Champion helping ten people in a year can realise a high level of channel shift savings and high social value. As such, being part of the Digital Champions Network can deliver financial and social benefits across your entire community.

Don't miss out! All membership levels provide access to the wide programme of training and support offered for Digital Champions. With Premium and Premium Plus membership you also have expert organisation and project support, including a toolkit and comprehensive suite of management information.

For individuals working with small charitable organisations or volunteering on their own in their communities there are a limited number of free membership licences available so [please get in touch](#) to find out more.
